A LITTLE ABOUT THE BUILDER:

Jon Nissen of Woodland Custom Homes has been in the construction business for over 20 years. He started his long career with a national lumber company working in sales which allowed him to see all aspects of building and has worked hand in hand with every builder in the Toledo area. Jon decided to leave his job to pursue his dream of building homes. Before he leapt into the actual building of homes, he put in his time in the trenches. He has learned from some of the best carpenters, framers, window installers, roofing and so much more over the last three years. Jon feels the importance of knowing all of these skills will keep your custom built home something to be proud of. Jon takes pride in his craftsmanship; therefore, Jon is always on site making sure the contractors understand the vision of your home and making sure nothing is missed. Woodland Custom Homes wants to build you a custom built home at a "value" price.
